

2/16/69

Mr. Henry Wade
District Attorney
Dallas, Texas

Dear Mr. Wade,

C
O
P
Y

There now is no question but that the late President's wounds were other than officially accounted for and, in the so-called "fatal" wound, located other than where placed officially. I have just completed a book on this, with the documentary proof.

This means that the crime committed within your jurisdiction is now established to have been other than we have been told. At the very least, we now have the irrefutable scientific proof that it was beyond the capacity of any one man. Let me explain, hurriedly. The source of information is the report of the Attorney General's panel, a monumental non sequitur if there ever was one. However, they did read the still-existing X-rays (some have disappeared - by remarkable coincidence, exactly those ordered by Colonel Finck, when he got to the autopsy - and at least one is burned in two place).

The point of entrance of this fatal shot is the top of the head, not the back at all. The description by the panel is entirely different than that of the autopsy, including in size. The so-called non-fatal shot did hit bone, which even more makes impossible the already-impossible explanation of how Governor Connally was shot. It did leave fragments in the President's thoracic area, despite the perjury of the autopsy prosecutor. Upon discovering this I consulted a local radiologist who confirms my reading of this evidence. He is studying it further, to see if he can find in it what I have not. I also communicated this information to Dr. Cyril Wecht, who is one of the outstanding forensic pathologists in the country. He agrees and has already testified to this meaning in the report. I think you should know the Department of Justice made no effort to challenge this in court Friday, thus acknowledging that it conceded the President was both shot in the top of the head and that the official explanation of the crimes is false.

This fits with the other things I have discovered, a few of which I have reported to you. I do not know how much of this, if any, will come out in New Orleans, for the federal government may yet succeed in its effort to make it moot. I left there before the jury was empanelled in order to complete this analysis, for I believe, in the long run, it is more important than what can happen there. I now have more than 50,000 words written on it.

You may recall I told you that certain evidence having to do with Oswald as an agent was destroyed. I now know how, where, by whom and when. All of this will be available to you if you ever want or have need for it, as I told you. I do not know when I can get to Dallas again, but as you know, this is all available to you if you are ever in this area again.

In another area, where I also have a completed but unpublished book, on the involvement of the vicious racist extremists, I have just obtained a copy of the so-called "Personal News Letter" of Dr. Edward R. Fields of the NSRP. It is dated last month. The part that is of special interest to me reads:

"The first person actually picked up for questioning in the assassination was the local Dallas Chairman of the National States Rights Party, Jimmy Robinson. About four other Right Wing leaders were also picked up by the police and given the third degree...when Oswald was arrested... Jimmy Robinson was released..."

Fields is hardly a dependable commentator, yet I doubt he would have invented this. I am aware of the arrests of the Joiner group. If you can shed any light on Robinson, I'd appreciate it, and I would suggest you might want to keep a file on this for, without doubt, there were not fewer than four threats against the President by various elements of the NSRP known to and suppressed or misrepresented by the federal government.

My other information on Robinson is of Secret Service origin. It gives his name as Jimmy George and his 1963 employment as by the Long Oil Co.

One NSRP leader who first blueprinted the assassination and later took credit for it is Joseph Adams Milteer, of Georgia. I have information I cannot substantiate that he was in Dallas the morning of the assassination. He flew in and out and was seen in Jacksonville, Florida, the next day. It is because of this known threat against the President that he had to change his arrangements for his November 18 appearance in Miami. Should this ever be of interest to you, two possible means of checking it out exist. He is said to have flown and to have used the telephone, long distance, of which there should be a record. Your local police had good sources of information on the NSRP. It certainly had more than it gave the Warren Commission, and the Commission suppressed what it did have, in at least one case actually removing from the exhibits what was entered into evidence. I now have a copy of what was expunged.

Please excuse the haste in which I write. Perhaps, because you are District Attorney, I should have given you this information on the nature and location of the wounds earlier, but my intense concentration was in getting it all on paper in comprehensible form. It leaves little doubt that you have an unsolved pair of crimes there.

Sincerely,

Harold Weisberg
